SERVER SUPPORT FOR BUSINESS

01 ELIMINATE LOAD TIMES

Eliminate load times with server support. Your servers "serve" up your data or files or applications to end devices where they have to do a round trip to the server. A poorly-managed server will cause longer deliveries of data, longer waiting times, and diminution of customer satisfaction.

02 TAKE CONTROL OF YOUR DATA

We are giving away our personal information to the internet. Companies use it as much as they can because they see it works. The only defense is to take control of your data yourself. Our service will support you how to do that – how to protect your sensitive information, how to correct errors, and how to keep an eye on your customers' data so abusers won't be collecting things you'd rather keep private.

03 SAVE AND SCALE FASTER

Troinet provides premium server scaling and administration services at an unbeatable value. We take care of security, backups, monitoring, and more. With Troinet, you can focus on your business knowing that your servers are in good hands.

04 SECURITY FOR YOUR DATA

Troinet offers data center and server management focusing on the security of your data. We ensure your data is hosted in a secure, stable and professional environment. We provide the necessary services to run your servers, from data center co-location and rack space to servers and support.

05 LESSER HEADACHES

Experience less headaches and peace of mind because of secure and professionally-managed server infrastructure. Our server management includes everything you need be it migration processes, be it the outage of a system, we assist in rectifying and resolving problems with your dedicated servers.

06 DISASTER RESILIENCY

Our server monitoring and management platform allows you to remotely monitor your servers with minimal capital investment, while protecting them from disasters like power outages, network failures, floods, fires, and physical tampering.
